mmsv2 (version 0.4, 23 mar 2008)

Classes

Player
PlayList

class Player()

Player(player)

player   : bool (use player to play video (True) or audio (False))

Default values:

player=False

Methods defined here:

play() -- Starts playing current media file from internal playlist.

play(path, [title])

path   : string
title   : string

Method will clear internal playlist and add given media file to internal
playlist. It will then start to play media file.

play(position)

position   : integer

Starts playing media file in given position from internal playlist.

play(playlist)

playlist   : PlayList (see class below)

Method will clear internal playlist and add media files form given
playlist. It will then start to play first media file in internal
playlist.

stop() -- Stop player.

pause() -- Pause player.

mute() -- Mute player.

volup() -- Increase volume.

voldown() -- Decrease volume.

ff() -- Fast forward.

fb() -- Fast backward.

next() -- Play next in internal playlist.

prev() -- Play previous in internal playlist.

getPlayList() -- Get a reference to internal playlist.

class **PlayList()**

PlayList()

Methods defined here:

load(path)

path   : string

Method will load a file from disk. Format of the file can be mms playlists or shoutcast like playlists.

clear() -- Will remove all media files from the playlist.

remove(position)

position   : integer

Method will remove media file in given position from playlist.

add(path, [title])

path   : string
title   : string

Method will add given media file to playlist.

toList() -- Returns a list containing all playlist titles.

size()-- Returns number of media files in playlist.
