

GAME MANUAL

Egoboo (Ee-go-boo) is a OpenGL game, and requires a 3D graphics card to play. You can try it in software mode, but it's not supported. If you have problems, run either of the Setup files.

Egoboo is freeware, open source, but it is not finished and is still being developed by a small team. So check the websites for updates, editors and etc..

<http://egoboo.sourceforge.net/>

Original Game Idea: Aaron Bishop and Ben Bishop
Manual By: Zefz aka Johan Jansen

1. EGOBOO

Welcome to Egoboo! Egoboo is a game set in the realm of Bishopia. King Bishop, the lord of the realm, has been kidnapped by a ancient lich king! It's your quest to find the five magic sporks to open the ancient catacombs, kill the lich and rescue King Bishop. What is Egoboo? Egoboo is a 3d dungeon crawling adventure in the spirit of NetHack. It uses OpenGL and SDL. It should run on any WinOS, Unix, and MacOS X system. You can check the official Egoboo website: <http://egoboo.sourceforge.net/> Or you can take a look in the forum for game support and to join our development: <http://egoboo.informe.com/forum/> For latest changes in the last patch, read the Changelog.txt document which contains all changes made since version 2.22

System Minimum Requirements

These are the minimum we know it works on, but it might very well work on less. Tune down some graphical effects if the frame rate is low.

Processor: PentiumIII/Athlon with 2.0 GHz

Memory: 256 MB RAM (512MB RAM Recommended)

Video: Any graphical 128 mb gfx card supporting OpenGL graphics

Other: For Hotseat, Egoboo requires gamepads or a connected mouse. Internet or LAN/UDP is required for multiplayer. (Egoboo 2.3.6 and later does not have networked multiplayer)

Setup Information

You can change graphical and audio settings in-game through the options menu. If you want to change input controls though, you will need to edit controls.txt (See the section about controls for more information).

GRAPHICS

Texture Filtering: This manages the quality in which manner textures are filtered.

Fullscreen: Should the game be played fullscreen or not?

Z Bit: Enhances the color depth quality if set higher (32 is maximum).

Screensize: Overall graphical quality – higher number increases graphic quality.

Max Number of Text Messages: How many information messages can be displayed at the same time (Reduce this only if they cover too much of your screen – in case of low screensize).

Antialiasing: This will enable antialiasing which increase model detail and sharper borders.

Particle Effects: This manages which types of particles the game is to load. Normal is standard, Smooth looks better, but loses some detail while Fast has low color bits and are faster to render.

Autoturn Camera: Adjust the autoturn function for the camera which follows the players.

Reflection: This decides the quality of floor reflections or disable reflections.

Shadows: This sets shadow quality or disables it altogether.

3D Effects: This option will increase 3D quality and enable special 3D effects.

Pretty Water: Enabling this will increase water graphic quality.

Vertical Sync: Wait for vertical synchronization? Enable this if you see tearing on the screen.

SOUND

Sound: Allow sounds to be played?

Sound Volume: The volume of all sound effects.

Music: Allow interactive music to be played?

Music Volume: The sound volume of all musical tracks that are played.

Buffer Size: This will reduce lags and stutters in music, but will cause a overall delay for all sounds played. You will need to find a balance for your pc (So that sounds arent too much delayed and music works normally).

Max Sound Channels: The maximum number of sounds that can be played at the same time.

2. STARTING a NEW CHARACTER

To begin play as a new character, simply choose click the Start New game button. The menu will now list all the Starter Modules. Each character class has its own Starter module, to get you used to that character's style of play. When you beat a module, your character and his or her inventories are automatically saved (Remember to pick up any items you want to keep before finishing the starter module). Hidden modules may also become playable. It is recommended that you play the adventurer module the first time you play. You can also play as one of the pre-made characters if you wish (They should come with the package you downloaded).

3. CHARACTER CLASSES

ADVENTURER

An Adventurer is a Jack-of-All-Trades. He is able to use most weapons as well as magic. Adventurers pay for this versatility, however, being unable to advance as far as other classes.

Skills: Literate, Arcane Magic, Fighting.

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 5-8 | 1-2 |
| Mana | 2-4 | 1 |
| Mana Return | 3-5 | - |
| Strength | 6-10 | 1-2 |
| Wisdom | 10-12 | 1-2 |
| Intelligence | 13-15 | 1-2 |
| Dexterity | 14-15 | 1-2 |

WIZARD

A Wizard is master of the arcane, spells being his primary offence. He is incredibly frail, so stay out of close combat with this character. They use books to use their magics. Wizards learn using spells by intense studying and learning from ancient books. They often carry magic potions to refill their mana.

Skills: Arcane Magic, Literate, Alchemy

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 4-5 | 1 |
| Mana | 8-10 | 2-3 |
| Mana Return | 3-4 | 0.20 |
| Strength | 4-7 | 0-1 |
| Wisdom | 10-13 | 1-2 |
| Intelligence | 17-20 | 2-3 |
| Dexterity | 8-10 | 0-1 |

HEALER

A Healer works to cleanse the earth of the undead and other evils. She is an able fighter, but is more at home in the back lines tending to the wounded. Her innate healing powers are usable only when unarmed.

Skills: Divine Magic, Banish evil, See Courses

Literate

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 6-8 | 1-2 |
| Mana | 5-7 | 1-2 |
| Mana Return | 3-5 | 1 |
| Strength | 8-14 | 0-1 |
| Wisdom | 16-20 | 1-4 |
| Intelligence | 8-12 | 0-1 |
| Dexterity | 7-12 | 1-2 |

SOLDIER

A soldier is a master in the martial arts. He cannot use any type of magic, but he can use all weapons and heavy armours. His high health, armour and strength makes him an excellent warrior. The soldier's job is to defend the group and attack monsters too dangerous for the others to rush into.

Skills: Fighting, Defence, Jousting.

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 9-10 | 2-3 |
| Mana | - | - |
| Mana Return | - | - |
| Strength | 16-20 | 2-4 |
| Wisdom | 6-12 | 0-1 |
| Intelligence | 4-7 | - |
| Dexterity | 11-14 | 1-2 |

ELF

The elf works in strong magic and with bows. He can a little bit of both of those and can be very deadly at range (Sending fireballs followed by a swarm of arrows). His hitpoints and strength is VERY poor so take care to keep out of close combat!

Skills: Arcane magic, Nature lore., Fighting
Literate

| Ability | Starting | Level Up |
|-------------|----------|----------|
| Hitpoints | 4-5 | 0-1 |
| Mana | 3-4 | 0-1 |
| Mana Return | 6 | 1 |
| Strength | 4-6 | - |
| Wisdom | 13-15 | 0-2 |

| | | |
|--------------|-------|-----|
| Intelligence | 18-22 | 1-3 |
| Dexterity | 17-22 | 1-3 |

G'NOMES

A G'nome is very strong in advanced weapons and tricks, such as traps and guns. They are very intelligent, but they are often foolish (Low wisdom) and evolves very slowly. G'nomes are very hardy and have a lot of health (Which makes them a not so bad combat class). If it whirls, clicks or steams, he can operate it.

Skills: Operate technological items, Read G'nomish, Healing Factor, G'nomish Resistance.

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 10-12 | 2-3 |
| Mana | - | - |
| Mana Return | - | - |
| Strength | 12-16 | 1-2 |
| Wisdom | 3-4 | 0 |
| Intelligence | 15-20 | 1-2 |
| Dexterity | 11-13 | 1-2 |

ROGUE

The rogue is handy in every group. He is very fast and his skills are unique for his class, because no other classes can disarm traps, search and sneak attack as the rogue does. His poison and assassin skills are very handy too. Although he is not the person to charge into battle and start the fight in hand to hand combat.

Skills: Backstab, Disarm traps, Find secrets, Poison use, Acrobacy.

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 5-6 | 1-2 |
| Mana | - | - |
| Mana Return | - | - |
| Strength | 11-14 | 0-1 |
| Wisdom | 5-7 | 0 |
| Intelligence | 6-8 | 1-2 |
| Dexterity | 18-23 | 2-3 |

PALADIN

The Paladin is a noble hunter of evil and undead and a true and lawful class. They have the healing skills of a Healer and some fighting skills of the Soldier. The Paladin is the slowest class and has the lowest dexterity of them all. He is also a protector of good and legal things. Paladins gain bonus xp for doing quests. At first level, the paladin is an ordinary soldier, but as he ascends to higher levels he will go his own path to a divine warrior of justice.

Skills: Divine magic, Banish evil, Fighting, Jousting and Literate

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 6-8 | 1-2 |
| Mana | - | 1 |
| Mana Return | 2.5 | 0.10 |
| Strength | 13-15 | 1-2 |
| Wisdom | 13-15 | 1-3 |
| Intelligence | 6-8 | 0-1 |
| Dexterity | 5-7 | 0 |

ARCHAEOLOGIST (COMING SOON)

The Archaeologist strives for discovering and exploring hidden secrets in ancient and mouldy dungeons. He is an expert at obtaining treasure that he can bring safely out, bypassing the guardians and traps. The Archaeologist is adept at using whips and guns.

Skills: Operate Technological Items, Disarm Traps
Literate, See Kurses, Alchemy and
Find Secrets

| Ability | Starting | Level Up |
|--------------|----------|----------|
| Hitpoints | 7-8 | 1-2 |
| Mana | - | - |
| Mana Return | - | - |
| Strength | 12-14 | 1-2 |
| Wisdom | 9-11 | 0-1 |
| Intelligence | 13-16 | 1-3 |
| Dexterity | 15-18 | 1-3 |

OTHER CLASSES

There are some special rare classes such as the tourist. Find them! They are very rare, so you can search very long before finding one.

(Warning: As in the current version of Egoboo,

no secret classes have been added yet).

Examples of special classes: Tourist, Vampyre and the Necromancer.

Skill Description

FIGHTING: The fighting skill indicates that the class can use any weapon that requires advanced training to use.

ARCANE MAGIC: Arcane magic gives the character powerful offensive and some defensive spells. To use arcane spells, you need different books you buy or find in different dungeons. Intelligence increases your power with arcane spells.

DIVINE MAGIC: Characters with divine magic can heal other wounded characters. Also divine magic users hates arcane magic. So if such a character finds an arcane spell book, that character should burn the book. Players can use divine magic to cure poison. In addition, this skill enables the player to use rune magic and holy symbols. Wisdom increases healing effectivity.

BANISH EVIL: A divine magical user can use his or her divine power to destroy undead. Some undead can only be hurt or killed by this effect. In addition, some Undead, such as the Vampire, panic when they get hurt by holy damage. This ability is activated by unarmed attacks.

DEFENCE: The defence skill shows that the character can use heavy, protective, but also more flexible armour types. Characters with this skill take less damage than other characters from normal attacks.

JOUSTING: The jousting skill gives a character the ability to use a lance and charge attack from a mount.

NATURE LORE: The nature lore skill is only available to the Elf. The skill gives the Elf the ability to talk and have contact with nature and wild animals. Wild animals also tend to be more friendly to a elf.

OPERATE TECHNOLOGICAL ITEMS: This skill gives the G'nomes the ability to operate their advanced technological inventions. This includes items such as oil lantern and bear traps. The biggest advantage with this skill, is the advantage of using the deadly weapon of gunpowder (Eg. guns and explosive devices).

READ G'NOMISH: The ability to read G'nomish is very useful in Bishopia. The skill gives the character the ability to read all sorts of G'nomish writings. Clues on a riddle or a warning is often written in G'nomish.

BACKSTAB: This ability is used by the rogue to murder specific monsters instantly with one deadly strike. Sleeping monsters and attacking unaware enemies from behind are the most common ways to murder creatures.

DISARM TRAPS: This ability indicates that the character can disarm and maybe even pick up traps for later use.

FIND SECRETS: The find secrets skill gives the character a high possibility to find hidden

and maybe even invisible items, passages, traps or chests.

USE POISON: Use poison is a skill used by the Rogue. The skill gives the character the ability to use poisoned weapons and poisoned items without danger of poisoning himself (Or his friends).

G'NOMISH RESISTANCE: G'nomes are resistant (If not immune) against all special types of damage (Poison, fire, cold, etc.). This includes the divine healing of the Healer and Paladin. G'nomes are also immune to being grogged (A sort of stunned confusion state).

HEALING FACTOR: G'nomes with level 3 armor using a claw gain a Healing Factor bonus. This will steadily regenerate the G'nomes life points (Stacks with Ancient Blood special power).

SEE KURSES: This ability enables the healer to see any items that are Kursed. Items that are kursed will automatically flash black.

LITERATE: A character with this skill can read most texts and scripts that are not written in a special language. This skill is required to be able to use scrolls.

ACROBACY: A character with this skill can preform the feat of double jumps.

ALCHEMY: This skill allows a character to automagically identify any potion , vial or flask he or she picks up.

Whenever a character uses a skill special for his or her class, he or she gains bonus experience if he successes with the task. For example a Healer gains extra exp when burning arcane spellbooks or banishing undead, while a Rogue gains bonus exp when backstabbing sleeping monsters.

Class Special Power

Each class has a hidden special power that can only be unlocked by obtaining 10000 experience points (Which is not a easy task). This special power is permanent active as long as the player continues to have 10000 xp. Be warned however, should you die (And thus lose xp), you will need to regain your xp if you lost so much that you went below 10000 xp. You will se a magical glow around your character (What it looks like depends on your class) to show you have this imbued power. Each class has its own separate special power as shown in this list:

| CLASS | Special Ability | Bonus |
|--------------|------------------------|--|
| Adventurer | Class Mastery | +5 bonus to Strenght, Intelligence and Dexterity |
| Healer | Divine Power | Instantly come back to life when killed and may use life as mana |
| Wizard | Mystic Intellect | +15 bonus to intelligence |
| Soldier | Weapon Mastery | +2 damage bonus on all attacks |
| Elf | Magic Surge | Mana regeneration greatly boosted |
| G'nome | Ancient Blood | Natural Health regeneration |
| Rogue | Acrobatic Mastery | Can preform triple jumps |

| | | |
|---------------|----------|-----------------------------------|
| Archaeologist | Lucky | Gives a small bonus to everything |
| Paladin | Crusader | Converts Evil damage to mana |

Developing your Character

Each time a class gets enough experience, he gains a level up. With each level up the character's abilities improves. Different classes gain some abilities faster than other classes. Also, other classes may improve very slowly in an ability or skill. Here is a list of how much exp the classes need before gaining a level up:

| LEVEL | 1 | 2 | 3 | 4 | 5 | 6 |
|--------------|---|-----|------|------|------|------|
| CLASS | | | | | | |
| Adventurer | 0 | 300 | 900 | 2700 | 5400 | 7500 |
| Healer | 0 | 250 | 800 | 2000 | 4000 | 7000 |
| Wizard | 0 | 400 | 1000 | 2000 | 4000 | 8000 |
| Soldier | 0 | 300 | 900 | 2000 | 4500 | 8500 |
| Elf | 0 | 400 | 1200 | 3500 | 6250 | 9500 |
| G'nome | 0 | 500 | 1200 | 2400 | 4800 | 9500 |
| Rogue | 0 | 250 | 650 | 1800 | 4000 | 8000 |
| Paladin | 0 | 500 | 1200 | 2400 | 4800 | 9600 |

Beyond level 6

Gaining a level beyond 6 requires even more experience indicated in the tables above. The higher level a character becomes, the longer it takes to reach the next level. There is no limit to the level a character can become.

Death and Dying

Death in Egoboo usually isn't permanent, but it's not a good thing either. Your character will drop both in-hand items, all of his or her keys, and all the Zorkmids (Money) he or she is carrying. If you press the Spacebar to respawn, your character loses 15% of his or her total experience and is returned to the start of the module. In multiplayer games, carry Scrolls of Rebirth or join up with a Healer to avoid these bad effects (Being resurrected this way does not result in XP loss!). In single player games, carry more Life Potions. Be warned: Some special modules do not allow you to respawn if you die (Meaning that you have to restart the module from the beginning again). You never permanently lose your character from the game (It is always possible to return either by accepting some penalty or restarting the current module). Warning: The more experience you have, the greater the xp penalty for death will be! (For example a character with 1800 xp loses 270 xp upon death, while one with 7300 xp loses 1095 xp!).

4. GAME CONTROLS

Egoboo supports up to 4 players on any one computer, and 3 different input devices. Each of these devices can be customized in CONTROLS.TXT, but the defaults are listed below. (You might be able to play 4 if you have 2 joysticks). CONTROLS.TXT is located in the main Egoboo folder.

General Keys

These are default keys and cannot be changed.

Escape quits the game

1, 2, 3, and 4 give character stats

SPACE is used to respawn if you have died

F11 makes a screenshot

F6, F7, F8, etc. show some extra debug information

(Not very useful unless you are a developer)

Default Keyboard Keys

T and Y attack

G and H drop and grab items

B and N rotate inventory

Number pad arrows move the character, 0 on pad jumps

7 and 9 on the number pad rotate the view

+ and - on the number pad zoom the view

Mouse Play

Mouse sensitivity plays a great role here. Your mouse may be too fast or too slow. If it is too slow, increase sensitivity and vice versa if it is too fast.

Also try to use slow and continuous movements.

Try various button combinations and find out which one is the best for you. Remember that you can also use mouse button 3 and 4 (But Egoboo does not support the scrolling button).

Joystick Play

Simplest, but you'll need 8 buttons for full control, otherwise you'll need to use it in conjunction with the keyboard.

Changing Controls

Whenever you want to change the controls just edit controls.txt, which is located in the Egoboo folder. These are the different commands you use when editing:

KEY_<YOUR CHOICE OF A KEY> = Normal keyboard key
KEY_PAD_<YOUR CHOICE OF A KEY> = Numpad keyboard key
MOS_<YOUR CHOICE OF A BUTTON> = Mouse button
JOY_<YOUR CHOICE OF A BUTTON> = Joystick button

5. PLAYER DISPLAY

Each player has a little portrait on the right side of the screen, with one or two status bars below it and two more little pictures to the left and right.

The character's name (abbreviated) and money (Zorkmids) is located above the portrait. The portrait itself indicates the your physical appearance and armour. The image to the left of the portrait shows the weapon in the your left hand, the right image is your right hand. The red status bar is your life. When this bar is empty, your character dies. The other bar is mana, the magical energy of your character.

Mana comes back with time, but impatient folk drink mana potions... If your status bars change colour, it means something is unusual. For example, the life bar may change to green if you are poisoned.

Character Stats

In addition to the status displays, you can press the number keys along the top of the keyboard (1,2,3,4) to get more specific information regarding your character. The character's full name and level are displayed, along with several stats, each of which affects the game in many ways. The higher the number, the better. Here's a list of the stats and one benefit for each:

STRENGTH

The STR stat is the character's strength, and affects the use of melee weapons. Each point gives a small point to all melee weapon damage. How much damage it increases, depends on the type of weapon you use. Spears for example benefit only +5% bonus damage from your strength (20 strength equals +1 damage). A lance benefits you a great +50% bonus damage derived from strength (14 strength equals +7 damage). The most common weapon, the sword, benefits a 20% strength bonus to damage. Strength also increases the throwing range of all throwing weapons. In addition your strength score affects the knockback power of your melee strikes.

WISDOM

The WIS stat is the character's wisdom, and affects the use of Divine Magics. Some runes have requirements on a high wisdom before they can be used effectively.

Wisdom also increases your chances to find secrets (Such as hidden passages and secret chest bottoms).

When characters use poisoned weapons without the Use Poison skill, they have a chance of accidentally poisoning themselves. Wisdom reduces the chance for this to happen. Lastly your wisdom score affects your damage resistance against arcane spells. Every point of wisdom reduces arcane damage by 1%.

INTELLIGENCE

The INT stat is the character's intelligence, and affects the use of Arcane Magics. Spells benefit from more damage, effect, control and power from a higher intelligence.

Intelligence also helps you identify rare components, ingredients and decipher coded runes and scripts. Lastly your intelligence score affects your resistance against divine spells. Each point of intelligence reduces divine spell damage by 1%.

DEXTERITY

The DEX stat is the character's dexterity, and affects the accuracy of ranged weapons. Each point of dexterity increases your chance to hit an enemy. Characters with less than 10 DEX will often miss about 40% of their attacks. Characters with above 20 DEX will have autoaim on their enemies (Ranged projectiles will automatically aim in on their target). Dexterity also increases throwing weapon accuracy. In addition your dexterity will affect your character's movement manoeuvrability.

DEFENCE

The DEF stat is the character's defence, and decreases damage done to the character. Special resistances or immunities to specific damage types may also apply before reducing damage through defence (Resistances or immunities are not shown in the status bar and are obtained in special ways such as magic). The maximum defence is 200.

EXPERIENCE

The EXP stat is the character's experience. When a character has enough experience, he or she gains a level and gains more of the other stats. Killing monsters is one way to gain experience, but each character class offers its own unique possibilities. For example, an Adventurer may gain a substantial amount of experience for finding a level map, while a Healer benefits from destroying Undead.

Status Condition Types

There are different types of afflictions a character can have in Egoboo other than normal hit point damage. Many are caused by special powers or spells. These effects are described below in detail:

Burning

Some fiery effects can set a character on fire. A character that is on fire will take continually small amounts of fire damage. Examples are the fire ball or a dragon's breath weapon. The Restoration spell or soaking yourself in water will usually kill the fire.

Dazed

This is a type of confusion from some sort of impact and causes difficult and uncontrolled movement. Examples are the Meteor spell or the Whip weapon. No spell or effect can remove this status.

Energy Drain

Energy Drain lowers your max life and is usually permanent! Examples on creatures that cause this are the Ghosts and Vampires. Life lost this way can be restored through the Restoration spell and is replenished automatically when you complete a module.

Frozen

Some cold effects render creatures frozen. This slows or completely stops their movement speed in addition to lowering dexterity, armor and jump power. Duration and effect varies and usually stacks. An example that causes this condition is the Frost Nova spell. Restoration removes this effect.

Grogged

A type of confusion from wooziness in the mind. An example is the confusion spell. No spell or effect can remove this status. A creature that is both dazed and grogged is in trouble...

Invisible

A creature that is invisible cannot be seen by other creatures unless they have a special ability that lets them do so. Invisible creatures can move past or attack other creatures without losing their invisibility. Some creatures have this special ability and invisibility can also be gained from the Unseen spell. Only the Seeing spell or a similar effect lets characters see invisible.

Kursed

Items that are cursed cannot be dropped or unequipped. In addition they usually also give some negative effect to its holder. Creatures that are cursed by some spell effect or trap gain a lot of different penalties on their stats. Only a Restoration or Unkurse spell can rid a character of a Curse.

Panicked

This condition only applies to monsters and NPC's. Sometimes creatures get

panicked for some reason. This may be because of some spell, poor morale (Team-mates or boss killed for example), because of its natural fears (Trolls fear fire and vampires holy for example) or lastly it may just be cowardice. Creatures that are feared run away and ignore everyone else for a period of time. Some creatures may regain their courage when a new leader arrives, they are healed or when backup arrives.

Paralysed

This status indicates that the player or creature affected cannot move their hands and/or the rest of their body (Depending on strength of the effect). Examples are the Fright monster or the Bind spell. Disenchant or Restoration can dispel this effect.

Poisoned

Poison constantly saps away the victim's life points until the duration runs out or the victim dies. Amount of damage and duration depends on the strength of the poison and its source. Poison always stacks. Examples are the Tranch monster or poisoned weapons. Healing effects or Restoration removes poison.

6. ITEMS

Weapon Types

Your character has restrictions on the types of weapons he or she may use. Healers, for example, attack with Maces and Clubs and are forbidden from other types. Here is a partial list of weapons, along with details about each one:

Axes and Hatchets

These weapons tend to have slow attack rates, but when they hit, they can do devastating damage to their targets. Axes generally benefit a 25% strength bonus to damage. Axes also have the useful ability to bypass shield defences.

Swords

Swords are the weapon of choice for large battles, as their sweeping attacks cut through several opponents in one swipe. They are among the best all around weapons and the most common. Swords usually benefit a 20% strength bonus to damage.

Daggers, Cinquanda and Claws

Daggers are known for their deadly speed, often killing an enemy before it can react. They don't do much damage, however, and are all but useless against heavily armoured foes. Another big penalty is its short range. Used much by Rogues. These weapons usually gain between 5% and 15% strength bonus.

Spears, Polearm and Halbred

Spears blend a swift attack with an extra long range, making it possible to damage an enemy with no fear of a counter attack. Some spears can be thrown if stacked. Polearm weapons only give a 5% strength Bonus.

Mace, Morningstar and Warhammer

These weapons are best used by strong characters, and do extra damage against

brittle creatures. Favoured weapon by the Healer. Blunt weapons benefit usually a 20% strength bonus to damage

Crossbow and Longbow

Crossbows are powerful weapons, capable of piercing even the thickest plate mail. Of course you might also put a hole in your best friend with one... The longbow has a much faster fire rate and longer range, but is harder to master than the crossbow. Only longbows gain a 5% strength bonus to damage.

Gunpowder

Gunpowder is a weapon used by the gnomes. Its very powerful, but however, the ammunition is limited. Be careful with gunpowder explosives, unless you want to blow up you and your friends.... Gunpowder weapons do not benefit from strength. Water is an sworn enemy to gunpowder.

Other

There are a few other miscellaneous weapons not fitting in the types above. These weapons usually have special purposes or abilities (Such as a torch for giving light and also dealing fire damage).

Armour Types

Each class has 4 sets of armour (Including the one he starts with). With a better armour, your character will live longer and maybe even resist special attacks.

A character may only wear armour permitted by his or her class. A Wizard likes robes, while an Adventurer prefers tunics, and a Healer only wears dresses. Finding "better" armour is often problematic, as no one type of armour is the best. Take plate mail for example. This armour provides great defence in hand to hand combat, but it slows down its wearer and Crossbows bite through it. Some armours provide more resistance to specific Attacks (Such as fire, magic or slashing weapons).

Equipment

Another category of items is equipment, things such as Bracelets and Amulets and Boots. To wear a piece of equipment, just grab it and put it into your inventory. Other miscellaneous items cannot be equipped or used in the normal way

(Such as keys or gems). These items are automatically used or sold for a lot of money in most shops.

Bracelet

Holy Symbol

Magic Powder

Diamond

Pets

In Egoboo, you may find a pet. Pets can help find things, help attacking enemies and numerous other simple tasks. You can keep a pet in your inventory, or just drop it on the ground and watch it go.

Whenever you “use” a pet in your hand, you will see the stats of your pet. A rebirth scroll can revive a dead pet back to life. Remember to pick up your pet before leaving a module or else you will lose him.

Bloodthirsty Squirrel

This is an aggressive combat pet. He eats enemy bodies to heal himself and grow stronger.

Tundra Bunny

This fuzzy little bunny is cold resistant and can pick up some items and bring them to you. They also bite enemies in combat.

Frog

This green little rascal has a poisonous tongue and can leap very high.

To see if your pet is doing good, you can “Use” him after picking him up and check his Joy score. The Joy score will adjust itself depending on the amount of wounds your pet has taken:

- :) - Perfect condition
- :] - Doing okay
- :[- A little bruised
- :(- Badly wounded

7. SPELLS

Sustain

Sustain is creating a effect that lasts over time (Often things like summoning a monster or enchanting a weapon). As the sustain effect is active, your mana will be constantly drained bit by bit. When all your mana is consumed, the spell will automatically discharge and dissappear. You can usually deactivate (Dismiss) sustain spells by casting the same spell again from the same spellbook.

Instant

You pay a amount of mana and get instant result and effect. Instant spells are usually used in combat and are useful because of their quick casting time. The downside with instant spells is that they often cost more mana than channeling spells (Or do less damage/effect).

Channel

With these spells you must cast the spell and sustain the magical energy before unleashing it on your unlucky foe. To do this, just hold down the attack button while holding the spell in the same hand. When some time has passed and the spell has charged (May take anything from 1 to 10 seconds) release the attack button to cast the spell. If still nothing happens, it may be that you dont have enough mana to sustain the whole channeling process, that you are to low level to cast the spell or that there is no target the spell can be cast on. Channel spells almost always takes longer time to cast, but the mana cost may be lower and the effect more powerful. With some channelig spells (Such as the Missle spell), the longer you charge, the more powerfull the result becomes.

Level

This describes the difficullity of the spell. Higher level spells require more skilled and powerfull casters. *Low* are usually for 1-2 level characters, *Medium* for levels 3-4, while *High* are for levels 5 and 6. If you are too low level the spell may simply fail or lose control!

ARCANE SPELLS

Books of arcane Magic are everywhere in Egoboo, all you have to do is find them (Some can be bought while some others can only be found in dungeons). Each Book contains one spell, usable by any arcane spellcaster. Healers would rather burn the Books... To cast a spell, simply pick up a book and press the use button. If that doesn't work, try holding in the button for a while to charge up the spell (Called channeling). If it still won't do anything, you may not be advanced enough to use it, or you might need to use it around a specific type of creature or item, or you might just be unlucky. Below is a description on all arcane spells in the world of Egoboo:

ANIMATE

This will animate a body to become your undead servant (A zombi). The body animated must be of a humanoid creature. A body can only be animated once. Animate is a Necromancy spell.

Casting Time: Sustain

Level: Low to High

BERSERK

When Berserk is cast, the subject will go into a blinding rage which will greatly enhance his or her combat abilities. First of all, life is greatly increased, secondly all damage is increased and lastly the characters strength is also boosted (Which may also increase damage for melee weapons). There is a drawback with this spell: While in rage the character will constantly lose a minor amount of life and he cannot end the rage willingly without the help of the caster (Who can either dismiss the spell or run out of mana).

Casting Time: Sustain

Level: Medium

BRIDGE

Creates a walkable bridge of solid light. Handy for getting over rivers, pit traps, streams of lava, etc. You can also dismiss the spell... Especially if it is over a pit with a huge monster on it.

Casting Time: Sustain

Level: Medium

BURNING HANDS

Creates a blast of fire spawned out of the casters hands. Does area effect fire damage and may set enemies afire (Dealing some damage each second). Damage dealt increases with intelligence (Every 3 points over 14 increases fire damage by +1, to a maximum of +5 damage at 27 intelligence).

Damage Type: Fire

Casting Time: Instant

Level: Low

BIND

This spell fully paralyses a creature in the spot it is currently standing. The victims wisdom increases it's chance to resist while the caster's intelligence decreases the chance.

Casting Time: Sustain

Level: Medium

DEATH CLOUD

After casting this spell, the caster will conjure clouds of deadly gaseous vapoours. Any creature passing trough it will rapidly lose life trough poison damage. This spell does not damage the caster (But it still damages his or her allies).

Damage Type: Poison

Casting Time: Channel

Level: High

ENCHANT WEAPON

This spell will enchant the weapon (If any) in the casters other hand. The weapon becomes magical and deals extra damage. Will not work if the caster does not have a normal weapon to enchant.

Damage Type: Magic

Casting Time: Sustain

Level: Low

FIREBALL

A devastating area effect spell, shooting a fiery ball of inferno to consume multiple foes at the same time. Power, accuracy and control increases with each level. Be carefull with this spell not to hit your friends with it!

Damage Type: Fire

Casting Time: Channel

Level: Medium

FROST NOVA

Casting this spell will unleash a blast of icy coldness around the spellcaster. The spell will do a little damage and slow (If not freeze) any creatures caught in it for a few seconds. Very handy for quickly getting away in close combat situations.

Damage Type: Cold

Casting Time: Instant

Level: Medium

GIANT

This spell will resize the player and enlarge him to a giant form. While in this form, he can stomp smaller enemies, crushing them under his feet.

Damage Type: Crushing

Casting Time: Sustain

Level: Low

HASTE

This spell will enchant the caster or one of his friends to boost his or hers speed considerably. Additionally, this spell slightly increases dexterity, defence and jump power. The spell requires a certain amount of level before it can be cast (Or else it will just fail).

Casting Time: Sustain

Level: Medium

ICICLE

Summons a few icicles, working as a trap and falling to any enemy who walks beneath them. These falling icicles will trap their enemies and pin them down for a short period of time.

Damage Type: Cold

Casting Time: Channel

Level: Low

IDENTIFY

Identifies any items the character has in his or her inventory.

Casting Time: Channel

Level: Low

LEVITATION

This spell will make the character levitate a short distance over the ground. This is handy for ignoring traps, lava, damage tiles or the like.

Casting Time: Sustain

Level: Medium

LIGHT

Summons a feary to light your way. Consumes tiny bits of mana while summoned.

Casting Time: Sustain

Level: Low

METEOR

This advanced spell summons a fiery ball of molten lava and sends it (Hopefully) down on his or her enemies. The meteor will daze them for a short while in addition to damaging the target. A high intelligence is required to cast this spell with good control.

Damage Type: Fire

Casting Time: Instant

Level: High

MISSILE

Shoots a couple of missiles. Experienced spellcasters can shoot more than 1 missile at the same time (Releasing a swarm of missiles later).

Damage Type: Zap

Casting Time: Channel

Level: Low

MORPH: LUMPKIN

Changes the player into a Lumpkin creature. Lumpkins will regard the player as a friend as long as he does not bust his disguise. Lumpkins have a very high dexterity (Making them useful in ranged combat), but low intelligence and wisdom.

Casting Time: Channel

Level: Low

ORB STORM

Spawns a horde of orbs and shoots them from your hand. Each orb deals damage in addition to dealing a special effect (Blue orb = Cold damage and *Freezing* while Yellow orbs do electricity in addition to *Dazing* your enemy for example). This spell is channeled for more power.

Damage Type: Special

Casting Time: Channel

Level: High

PROTECTION

Generates a protective shield around the caster. This shield increased defence and deflects incoming missiles.

Casting Time: Sustain

Level: Low

RING OF FIRE

This spell will unleash a ring of raging fire around the caster and damaging everyone near (Including the caster!). The caster will take only partial damage, but the other victims take full damage. The longer this spell is charged (Depending on the character level), the more powerful the blast will be.

Damage Type: Fire

Casting Time: Channel

Level: Low

ROT

Transforms any body into a rotting bomb which will explode when creatures come too close to it.

Damage Type: Evil

Casting Time: Channel

Level: Medium

TRUESIGHT

Lets the player see any invisible monsters, items or chests hidden to the normal eye. The spell will also reveal all kursed items in the same manner as the Healer skill See Kurse for the duration of the spell. Will make the eyes of the caster glow. This spell may be cast on friendly targets too.

Casting Time: Sustain

Level: Low

SHIELD

Shield is an another defensive spell like Protection. As opposed to the spell Protection it will give a greater amount of defence bonus and absorb some damage from all types of attacks. Additionally, the spell will reflect any incoming missiles back to their origin.

Casting Time: Sustain

Level: High

SHOCK

A touch attack dealing electrical damage. Ignores the protection of any armor the target may be wearing.

Damage Type: Zap

Casting Time: Instant

Level: Low

SKULL TRAP

While channelling this spell, you create a magical trap on the ground that looks like a skull. Any monsters who comes too close to it, will trigger it and unleash a fire blast.

Damage Type: Fire

Casting Time: Channel

STORM

Summons a thunder bolt from the sky to hit a single target. If the player has to little mana to summon the bolt, a rain cloud will be summoned instead (And any used mana is wasted). This spell always hits and ignores any armour if it is cast successfully.

Damage Type: Zap

Casting Time: Channel

SWORD WALL

Summons forth a volley of falling swords, forming a protective wall. The spell will also damage any creatures happening to be in the path of the falling swords.

Damage Type: Slashing

Casting Time: Channel

Level: Medium

TELEPORT

This advanced spell will teleport the caster a short distance away. This spell is very useful to pass obstacles, get out of melee combat and get over pit traps and such.

Casting Time: Channel

Level: High

THE UNSEEN

This spell will make the caster or any friendly target invisible.

Casting Time: Channel

Level: High

UNLOCK

This very useful spell will unlock any locked chest, door or gate (Unless it is a very special door or is warded against magic).

Casting Time: Channel

Level: Low

WHIRLWIND

This advanced spell will sling your enemies into a desired direction (Preferable into a pit of lava or something nasty like that). The spell itself does not do damage to the target. This spell requires a lot of skill to use effectively, but can be deadly if cast by the skilled wizard.

Damage Type: N/A

Casting Time: Instant

Level: Medium

DIVINE MAGIC

Divine Magic is accessed through relics, holy runes and the like. They can be found in dungeons or be bought in special shops. They cost divine mana to use and have usually more boosting, informative, protection and healing type spells rather than damaging and destructive ones such as Arcane spells often have. Divine spells are used and activated in the same way as Arcane spellbooks are.

COMBAT BLESSING

Combat Blessing gives all nearby allies including the caster him or herself a small useful bonus to armour, damage and speed. Secondly creatures affected by this spell gain double effect from healing spells (And can be healed by magic even if they could not before). Be warned! Nearby enemies will also benefit from this spell if it is cast when they are in the area!

Casting Time: Sustain

Level: Low

CONFUSION

The confusion spell dazes and grogs all creatures within an area of effect that the caster aims at. The confusion effect last for a considerable time. High wisdom is required to cast the spell with control.

Casting Time: Channel

Level: High

EVILWARD

This spell causes the target to become almost immune to damage from evil. Evil damage includes poison and dark magics.

Casting Time: Sustain

Level: Low

FIREWARD

This spell causes the target to become almost immune to damage from fire.

Casting Time: Sustain

Level: Low

FROSTWARD

This spell causes the target to become almost immune to damage from cold.

Casting Time: Sustain

Level: Low

HOLY BOLT

This spell shots a bolt of holy fire. It will damage undead and demons. It will usually heal other creatures (So it can be useful as a ranged healing spell!). Every two points of wisdom increases damage the bolt deals by one (Or heals).

Damage Type: Holy

Casting Time: Channel

Level: Medium

LIGHTNINGWARD

This spell causes the target to become almost immune to damage from lightning.

Casting Time: Sustain

Level: Low

RESSURECTION

This powerful spell will revive any fallen ally or mount from the dead at it's current spot. The target does not incur any experience penalty if brought back this way! A character that is revived is fully healed and cleansed. This spell has a fairly long casting time, so it is often useless in the heat of combat.

Casting Time: Channel

Level: High

RESTORATION

The Restoration spell will wipe all negative effects on the creature, including all poisons, curses, side effects, etc. In addition the spell will dispel any cursed items the character has in its hands or inventory. The spell will also heal the target 1 life for each wisdom the caster has.

Casting Time: Channel
Level: High

8. MULTIPLAYER

NOTE: Networked Multiplayer does not currently work, Hotseat play does though.

To play networked Egoboo, you'll need two or more computers connected via a decent speed network. Broadband internet might work; dialup internet probably won't. I don't think any LANs will have trouble playing the game.

One computer will be designated as the game host, and the other computers will be game clients. The client computers will all connect to the game host, and it will coordinate the playing of the game.

Before you can access the network part of the game, you'll need to enable networking in Setup.txt. To do this, just set NETWORK_ON to "TRUE". This is all you'll need to do on the host computer.

On a client computer, you'll also need to specify the hostname or (preferred) IP address of the game host in the HOST_NAME setting in Setup.txt. An example follows here:

```
E.g.:  
{NETWORK}  
[NETWORK_ON] : "TRUE"  
[HOST_NAME] : "egoboo.server.name"
```

Then double-click on Egoboo.exe to launch the game.

Once in the game, you'll see the Start or Join menu. The computer that's is going to host the game should choose "New Game" here, while the client computers will be choosing "Join Game"

The host computer will then pick a module to play, and then wait for other players to connect. As players connect, their computer's hostnames will appear in a list on the host computer. When everyone has connected, click on "Start Game" to move onto the character selection screen.

All players can then pick the character they wish to use from the character selection screen we all know and love. This works just like it does in single player. Note, the only characters you will see on this screen are the ones on your computer.

Once you pick your character, your computer will then send that character's data files over to the host computer, and once the host computer has all the client's files, it will send them to the other clients. This is where playing over the internet is likely to break down, in my opinion. I haven't had a chance to try it yet though.

Known Bugs

Currently, the multiplayer game will only run on Microsoft Windows machines, and has in fact only been tested on a few different Windows XP Professional machines. Your mileage may vary.

Only 2 computers are supported at the moment; it might seem like it's going to let more play, but not all of the information will get around to where it needs to go.

Play over the internet may not work all that well yet. As a result of the way Egoboo stores saved player characters, those characters have to be copied over the network each time a different module is loaded. With even the smallest characters being around 500k, it will take some time to get them copied everywhere they need to go.

If you find any more bugs, please report them to the forums. Thank you.

9. WORLD OF EGOBOO

WORLD MAP

The worldmap of Egoboo is called “Bishobia”. Here are many monsters, races and mystic, magical items inhabited. Big cities of humans, giants in the mountains, Dwarfs searching for gems, gold and mithrill deep in their mines. Egoboo is a large world to explore and many a danger waits. Will you be the hero who destroys the evil in this world and save the king? Or will you, like many others fall?

Bishobia

WORLD MAP AND DESCRIPTION

Plains

Bishobia proper is located in the lush green central plains. It is populated mostly by humans. There is a thriving seafaring community along the southern coast. Many port towns, as well as pirates, can be found along the coast.

The plains are a docile area for the most part. Many farms and small villages dot the landscape. There are a few cases of wandering lumpkins around the countryside. Occasionally, an adventurer can stumble across one of their lairs.

Also to be found in the plains are old abandoned castles and wizard towers that have been overrun by various beasties. The willing adventurer can find some quick treasure, and the

occasional magic item.

Bishopia, which lies near the Northern centre of the plains region, is the seat of power for King Bishop. King Bishop is the latest ruler in a long line of nobles. Recently the lands of the continent were unified under King Bishop's rule. There are still some hostilities among the various lands though, old differences do not die down easily. Many different races and people have things to gain from King Bishop's abduction.

In King Bishop's absence, the Arch Bishop of Bishopia has used the authority of the church to lead the continent until such time as the King is safely returned.

Elven Woods

The Elven Woods can be a tranquil place. However, during recent times of turmoil, even the Elven Woods are not entirely immune from evil. The Elf King, Laureatriel Swiftbow has long been a friend of King Bishop. In recent years a band of elves, known as the Dimlock Elves, have been vying for the crown of the Elf King. The Dimlock Elves would have much to gain from King Bishop's abduction. Laureatriel Swiftbow would not be able to call on Bishopia's armies for support if there were a Dimlock uprising during this time of turmoil.

The Dimlock Elves have long preferred living in caves rather than trees. Though not on friendly terms with other elves, the different elves tolerated each other until recently. Often trading would occur between the Dimlock and other tribes. Trade has now been cut off as the Dimlock Elves closed the door on the outside world. It is rumoured that the Dimlocks have turned to evil ways.

The heart of the Elven Realm is at Mighty Wood, the oldest and largest tree in the world is there. Around the Mighty Wood is held council of all the woodland creatures. Elves, Dryads, Treants and others meet in peace and harmony in this most sacred of places. All are sworn to commit no malice to each other in this place. Thus is peace kept here, if not in the rest of the world.

Snow Fields

The icy expanse of the Snow Fields can be a hazardous place for the unwary hero. Giant ice creatures haunt these lands. The only friends one might find are a few scattered villages of Vikings and G'nomes. In the heart of these frozen lands lies the Ice Palace, wherein is located one of the Sporks of Power.

The southern, more populated region of the Snow Fields is known as the Northerlands. The peoples of this area relish a good fight. Watch your back in the taverns and inns.

G'nome Lands

G'nome technology fills the cities and mines in this otherwise desolate land. Although the surface may seem rather bare, the underground is lush with precious metals and gems. Along the Western border of the G'nome Lands lies an escarpment. At the bottom of this cliff are the hot and barren Doom Wastes.

The hills and valleys of the G'nome lands hide bands of Cobols, Trolls and Lumpkins.

Doom Wastes

Beware the Doom Wastes. Nothing lives in these volcanic lands but Evil. The few human

inhabitants are strong and weary of strangers. Occasionally you may find guilds of wizards in these lands, researching some spell no doubt. Magic is strong in these wastes, as is the presence of Demonic forces.

Lava creatures issue forth from streams of magma. Undead animate and rally forth in search of the living. Deep in the bowels of the Doom Wastes, the Ash Palace hides it's treasure; one of the Sporks of Power.

Great Big Desert

Dry and desolate, the Great Big Desert is the home to many poisonous snakes and insects. The sand nomads that live here welcome strangers with open arms. Often you may find yourself in a harem. More often you may find yourself as lunch for a pack of jackals. Beware the Sandwhich.

The primary export of this region is sand. Often you will stumble across sand mines in your journeys.

Watch out for sand traps on your journey. Be on the lookout for the Sand Palace, the home of one of the Sporks of Power.

Stone Mountains

Many treasures, as well as many dangers await you in the Stone Mountains. This range of mountains runs across the length of the continent of Bishopia. Just to the west of center lies the tallest peak in Bishopia, Skully Mountain. Atop Skully Mountain is the Shadow Palace, where you will find one of the Sporks of Power.

The peoples of the Stone Mountains are a sturdy lot, comprised of both human and G'nome. The G'nome in this region mix up a hearty snack called G'Ranola, it provides all the energy one might need to climb a mountain.

MONSTERS

Some wise men of Bishopia have created a book about the monsters seen by brave adventurers. At least about those that didn't kill these adventurers before they were able to get away...

- Crab -

Danger: *

Well, this is what it is. A crab, not a monster. However, crabs are very easily enrageable, and they often go mad if they see someone enter their territory. Their claws may hurt, but they are really weak, so don't worry about these too much. Can be found at wet places.

- Grub Bug -

Danger: *

These are just big green bugs that often come in masses. They're neither really dangerous nor even evil. However, they hate being bumped, and they bite if someone does so.

- Fright -

Danger: *

They really look far more dangerous than they actually are, although they're nasty. Blows with normal weapons do not affect them, but they can be kicked away this way. Try not to touch them directly though, or you won't be able to move your arms for a while. This can mean your defeat in the heat of the combat, so beware...

- Mosquito -

Danger: **

Well, there's not very much to be explained about these. They are nasty, but you should actually know them yourself. Oh, and maybe they are a little big...

- Cobol -

Danger: **

This bearlike looking creature can be found almost anywhere. They like to mine around, but they like even more making slaves mine around for them. Although Cobols can handle a good deal of weapons they usually aren't very dangerous. However, watch out for their bows, especially if one of their captains is around...

- Lumpkin -

Danger: **

These strange-looking creatures have a dark purple skin and are very skilled with ranged weapons, as well as in flying airships. Because of this Lumpkins often become air pirates. Should you meet one, no matter if on solid ground or in the air, the only thing you have to watch out for is their ability to use gones.

- Ghoul -

Danger: **

They are dead. As dead as someone can be and still walk around. And they are evil. This is the work of really black, necromantic magic. Ghouls try to kill every living thing they see, and they actually are strong, but they also are very slow. If you should ever meet one, run - no matter how often you strike them down, they will always stand up again and get even more evil. Only high holy magic might be able to heal their souls and stop them from walking around...

- Ulna -

Danger: **

Skeletons with weapons. Really, it's that simple, they are nothing but skeletons with weapons. Oh well, maybe there is another difference - compared to normal skeletons they actually move...

- Gelfeet -

Danger: **

Nobody really knows what these strange cubes actually are. They are not very quick, but beware not to run into one, or else you might end up in its belly...

- Bull Wolf -

Danger: **

These creatures can be described as a big combination of a dog and a wolf. Their bites hurt, but they are not evil. They just obey the orders of their rider. If they do not have such a rider, they do not move. They live at various places, and thus some of them have changed their look, as well as their abilities, a bit.

- Mephit -

Danger: **

These can be described as winged demons, flying around to search for their prey. Their color depends on the type of the mephit, of which there are four different ones. Overall, however, they are rather weak.

- Grub Mum -

Danger: ***

Now this is a REALLY fat green bug. It's the mum of all those grub bugs, and essentially also just the same, with the exception for being a lot bigger. Being bit by this one really hurts, and blows seem to just go poof on her. However, she usually just runs away if sighted, so nobody managed to kill her yet.

- Tranch -

Danger: ***

This basically are just big, fat, brown spiders that jump around. However, they hunt for their prey like this, and unfortunately they usually regard adventurers as their prey... Their bites are poisonous, so beware. Yet they have the bad habit of getting crushed between doors...

- Squidgie -

Danger: ***

One cannot really describe what type of monster this exactly is, but some things are fact: It likes water, no matter what temperature, and it will zap you dead if you manage to get too close to one. Fight them with ranged attacks and keep them away.

- Frost Lizard -

Danger: ***

This lizard-like creatures can only be found at very cold places. It crawls over the snow and the ice and just turns around randomly. They have some kind of shell, so you can only damage them by attacking their weak point - their mouth. Unfortunately, however, this mouth spits out deadly ice clouds...

- Trog -

Danger: ****

Gigantic green or brown frogs. This is what they are. However, they like to wield spears and crossbows as weapons, and combined with their speed this makes them deadly enemies. Even worse, they almost always come in groups. Should you meet one, prepare yourself for a hard fight.

- Necromancer -

Danger: ****

These are mysterious dark figures, concealed by dark robes. They look just as evil as their necromantic magic is, and they also know how to use a weapon, so beware.

- Rust Monster -

Danger: *****

Nobody has actually ever met this monster. However, there is a legend about it. This legend says it is a gigantic insect-type monster that loves to eat rustable weapons and equipment, and uses these to heal its wounds. Nobody knows if this monster actually exists, but should you ever meet it, better fight it with wooden weapons and leather armor or powerful magic.

- Troll -

Danger: *****

Very little is known about trolls. It is said that they can regenerate their wounds in no time, and that their kicks are as deadly as the kicks of a dozen horses at the same time. It is said that they prefer cold places.

- Lich -

Danger: SUPER

Well... Unfortunately, not much is known about this monster, except for it being incredibly powerful. It is in fact so powerful, that the adventurer having sighted it ran for his life after one hit. He managed to tell us its dangerousness, but a few minutes later he died because of his wounds. Thus, if you see one: **RUN FOR YOUR LIFE! DO NOT TRY TO FIGHT IT!**

- Deamon Lord -

Danger: SUPER

It is said that this is the strongest demon in the whole world and that it summons all the necromantic monsters we know. However, this is just a rumor, and you better forget about it again...

10. EDITING FILES

Most data files for Egoboo are stored as .TXT files for easy modification, to encourage the growth and expansion of the game. If you are interested in making changes, see the HOW2EDIT.TXT file in the DEV bundle. The map files are .MPD files, and can be made with the included map editor. Yes, the map editor is bad, but it works. Well, it works sometimes. The image files are .BMP file, and can be made with the included paint program (nice for seamless tiles), or any commercial program. The model files are .MD2 files, and can be made with the included modeller. This program isn't mine, but it's what I used for everything. It'll grow on you. The sound files are .WAV files. I don't know of any free programs for doing full sound manipulation, but many sound cards come with programs that are good enough. Well they're good enough anyway. EgoMap is a map editor specially designed for Egoboo, you can download it from the Official Egoboo site. Whenever you have any questions about editing Egoboo, just go to the Egoboo forum (<http://egoboo.informe.com/forum/>).

Download the DEV package for all newest version Egoboo tools and unfinished material that you can work on!
http://sourceforge.net/project/showfiles.php?group_id=12221

Below there are different tutorials and information on how to edit and develop (Internet will be very handy if you plan to read some of these documents, as some contain links to various sites):

Objects - (Characters, items, monsters, etc.)

Scripts - (Monster AI, spawning points, passages, etc.)

Models - (Modelling, skinning and animation of objects)

Modules - (Dungeons, levels, cities containing lots of objects)

Making Objects

Objects in Egoboo modules are fairly simple, once you know a few little things about them. This topic will attempt to describe the basics of how this works to give the necessary background information.

Two major concepts

Modules basically contain two major parts related to objects: An "objects" directory which contains all the possible objects for that module, and a spawn.txt file, directing Egoboo where to put these objects.

OBJECT SLOTS:

The main thing to remember is that the "Objects" directory is used like a factory, to create objects in the module. Having just an object folder in the "objects" directory will do pretty much nothing unless it's also being spawned.

Each object directory (ex: sword.obj) contains several files, but the important one as far as modules are concerned is "data.txt". This file has a "Slot Number" as it's first entry. This is how the spawn file refers to any particular object. Each object must have a unique ID in the ranges of 36 to 255. (**NOTE: I am not positive of the upper limit**)

The first 36 slots are reserved for importing of characters. Since Egoboo supports 4 Hero's (Players) at a time, each Hero can have 8 items. 0 would be player one, and 1 through 8 would be his/her items. 9 would then be player 2, and so on.

If an object has a conflicting Slot Number, egoboo will exit immediately because it will not be able to tell them apart.

Whenever an object is manually copied into a different module, the "Slot Number" must be unique. The module editor EgoMap does this automatically if an object is imported from inside the editor.

SPAWNING:

The file "spawn.txt" is used to create objects. It use's the object's Slot Number to figure out which object to spawn, and makes an instance of it at the positions specified (in "spawn.txt"). Spawn.txt spawn.txt, located in the module.mod\gamedat folder, allows you to edit spawns for items, monsters, the hero and his\her items. It also allows you to give NPCs items. The spawn.txt file already has a basic bit of information included in its header.

Spawn.txt Basic Info This is a simple example of a spawn in a module. It will explain what the values and such mean.

```
// Name Slot Xpos Ypos Zpos Dir Mon Skn Pas Con Lvl Stt Gho Team
LUMPKIN 0: NONE 38 10.0 13.0 1.0 N 0 0 0 0 0 F F Evil
TORCH: NONE 40 0 0 0 R 0 0 0 0 0 F F NULL
CLAWS: NONE 42 0 0 0 L 0 0 0 0 0 F F NULL
```

Name: A name for the object. It seems it should be none for decorative items (ie: stools, tables, rugs, bookcases, etc), and NPCs may have a name associated with them (ie: in town.mod, the guards are named "a_Guard").

Slot: This is where the slot id number for an object goes. The slot ID number for items can be found in its data.txt. The object's slot IDs should start at 36, to leave room for the Heros to spawn. The hero's slots should be like so:

```
HERO 0: NONE 0 12.5 6.5 0.0 N 0 0 0 0 0 T F Good
HERO 1: NONE 1 0 0 0 L 0 0 0 0 0 F F Null
HERO 2: NONE 2 0 0 0 R 0 0 0 0 0 F F Null
HERO 3: NONE 3 0 0 0 I 0 0 0 0 0 F F Null
HERO 4: NONE 4 0 0 0 I 0 0 0 0 0 F F Null
```

HERO 5: NONE 5 0 0 0 I 0 0 0 0 0 F F Null
HERO 6: NONE 6 0 0 0 I 0 0 0 0 0 F F Null
HERO 7: NONE 7 0 0 0 I 0 0 0 0 0 F F Null
HERO 8: NONE 8 0 0 0 I 0 0 0 0 0 F F Null

HERO 9: NONE 9 11.5 6.5 0.0 N 0 0 0 0 0 T F Good
HERO 10: NONE 10 0 0 0 L 0 0 0 0 0 F F Null
HERO 11: NONE 11 0 0 0 R 0 0 0 0 0 F F Null
HERO 12: NONE 12 0 0 0 I 0 0 0 0 0 F F Null
HERO 13: NONE 13 0 0 0 I 0 0 0 0 0 F F Null
HERO 14: NONE 14 0 0 0 I 0 0 0 0 0 F F Null
HERO 15: NONE 15 0 0 0 I 0 0 0 0 0 F F Null
HERO 16: NONE 16 0 0 0 I 0 0 0 0 0 F F Null
HERO 17: NONE 17 0 0 0 I 0 0 0 0 0 F F Null

HERO 18: NONE 18 12.5 5.5 0.0 N 0 0 0 0 0 T F Good
HERO 19: NONE 19 0 0 0 L 0 0 0 0 0 F F Null
HERO 20: NONE 20 0 0 0 R 0 0 0 0 0 F F Null
HERO 21: NONE 21 0 0 0 I 0 0 0 0 0 F F Null
HERO 22: NONE 22 0 0 0 I 0 0 0 0 0 F F Null
HERO 23: NONE 23 0 0 0 I 0 0 0 0 0 F F Null
HERO 24: NONE 24 0 0 0 I 0 0 0 0 0 F F Null
HERO 25: NONE 25 0 0 0 I 0 0 0 0 0 F F Null
HERO 26: NONE 26 0 0 0 I 0 0 0 0 0 F F Null

HERO 27: NONE 27 11.5 5.5 0.0 N 0 0 0 0 0 T F Good
HERO 28: NONE 28 0 0 0 L 0 0 0 0 0 F F Null
HERO 29: NONE 29 0 0 0 R 0 0 0 0 0 F F Null
HERO 30: NONE 30 0 0 0 I 0 0 0 0 0 F F Null
HERO 31: NONE 31 0 0 0 I 0 0 0 0 0 F F Null
HERO 32: NONE 32 0 0 0 I 0 0 0 0 0 F F Null
HERO 33: NONE 33 0 0 0 I 0 0 0 0 0 F F Null
HERO 34: NONE 34 0 0 0 I 0 0 0 0 0 F F Null
HERO 35: NONE 35 0 0 0 I 0 0 0 0 0 F F Null

This ensures that the same hero won't spawn twice, or two separate hero's items won't be the same, etc. EgoMap doesn't do this correctly, so you must manually edit the hero spawn slots (as of April 11 2005, it may have been fixed since).

Xpos+Ypos: Xpos and Ypos are the coordinates of the item's\NPCs\etc spawn. It seems heroes should have .5 after the coordinate (does it really have too?). You can find the coordinates by using EgoMap and Cartman.

Zpos: The start elevation for the item\NPC\hero\etc. It also allows you to put an item atop of another item too (ie, you want a book on a table, so you set the Zpos for the book at 0.5, and the table at 0.0, so the book will fall onto the table when the module loads)

Dir: This is where the item should spawn in\on an item\NPC\hero\etc. The different settings are:

L: The item will spawn in the npc's\hero's\etc left hand. (weapons, books, and shields are what usually is spawned here. It also is used for mounts with only one grip) R: The item will spawn in the npc's\hero's\etc right hand. (weapons, books, and shields are what usually is spawned here) I: The item will spawn in the NPC's\hero's\etc inventory. (usefull for keys)

Mon: Gives an item\NPC\hero\etc extra money.

Skn: The skin that should be used for this level. It can be 0-3, or 4 if you want the NPC's\hero's (does it work with a hero?)\item\etc skin to be random. (note: to make braziers alight, set its skin to 20...)

Pas: The passage the item refers too. This can be used for braziers\switches\etc to open doors.

Con: Content setting for the character. It is used for armor chests.

Lvl: This defines what level an NPC will start at in this module. It does not work on players.

Stt: This will show the the status bar for an NPC\Hero if set to T (ie, in the adventurer module, the Mother Mim and Brom are set to 'T'), otherwise it will not show the status bar for the NPC\Hero if it is set to 'F'.

Gho: It has the same as the book of the Unseen, (as of now, April 11, 2005) inverting the Hero's\NPC\etc skin... It should make them invisible actually.

Team: The NPC\Hero\etc team. The first letter is used (so Evil can also be E, and Frog and be F, etc). On capital letters are used, so e and E are the same ('e' and 'E' and 'Evil' and 'Elf' and 'elf' are the same as far as spawn.txt is concerned). 'N' or Null is already set to be nuetral (it should be used on items, and NPCs (only if NPCs will not be a part of any team!)).

MAKING MODELS

Overview

Egoboo uses the Quake 2 .MD2 model format for object models.

Character Models

Character (Humanoid) models must have a left and right grip.

Grips are where weapons get attached to the character.

Each grip is represented by 4 vertices.

the grip vertices should be put into the character last!

Just cut and paste from some other model and you'll be fine.

Basically the grip vertices represent a matrix.

4 vertices = x rotation, y rotation, z rotation, and translation(position).

It is kind of hard to visualize when you are looking at the vertices in the model, but you can kind of see it. The vertex at the hand is the translation, the vertex in the positive x direction is the x rotation, etc...

Weapon Models

Weapon models must use a SPAWNLAST vertex.

It is an extra vertex that floats at the tip of the weapon.

Attack particles get spawned at this point.
the spawnlast vertex should be put into the model last!

Textures and Skinning

The latest version of Egoboo supports almost any texture format, Although we still use mostly the BMP file format and in some special cases the PNG (Which supports transparency).

Model Editors

GOLEM - Open GL Model Editor - Designed with Egoboo in mind.

Designed to be cross-platform (Linux, Mac OS, Windows)

Still in development.

Currently can Load and Save the Quake 2 model format that Egoboo uses.

Will support model modes which disable unsupported features and add validation. (One mode will be Egoboo)

Will support tag (grip) editing which will make editing models easier.

AZTEC - A 3d modeler which can be used to create egoboo models, not sure if it can be used for Egoboo yet

QUAKEME - Another modeler, you can download the full version here:

<http://www.edgefiles.com/dirs/965.html>

MDL - Quake 2 Modeler - Orignal modeler used to create egoboo models. Part of the extras download at <http://egoboo.sourceforge.net>

[Q2MTutorial2](#)

[Q2MTutorial3](#)

FRAME NAMES

The most important thing about creating a new model is to name your frames correctly.

The name consists of a 2 letter action type, followed by a the 2 digit frame number, followed by any special codes. It looks something like KA03SP.

Action Types

DA - Dance (Typical standing)

DB - Dance (Bored)

DC - Dance (Bored)

DD - Dance (Bored)

UA - Unarmed Attack (Left)

UB - Unarmed Attack (Left)

UC - Unarmed Attack (Right)

UD - Unarmed Attack (Right)

TA - Thrust Attack (Left)

TB - Thrust Attack (Left)

TC - Thrust Attack (Right)

TD - Thrust Attack (Right)

CA - Chop Attack (Left)

CB - Chop Attack (Left)

CC - Chop Attack (Right)

CD - Chop Attack (Right)
SA - Slice Attack (Left)
SB - Slice Attack (Left)
SC - Slice Attack (Right)
SD - Slice Attack (Right)
BA - Bash Attack (Left)
BB - Bash Attack (Left)
BC - Bash Attack (Right)
BD - Bash Attack (Right)
LA - Longbow Attack (Left)
LB - Longbow Attack (Left)
LC - Longbow Attack (Right)
LD - Longbow Attack (Right)
XA - Crossbow Attack (Left)
XB - Crossbow Attack (Left)
XC - Crossbow Attack (Right)
XD - Crossbow Attack (Right)
FA - Flinged Attack (Left)
FB - Flinged Attack (Left)
FC - Flinged Attack (Right)
FD - Flinged Attack (Right)
PA - Parry or Block (Left)
PB - Parry or Block (Left)
PC - Parry or Block (Right)
PD - Parry or Block (Right)
EA - Evade
EB - Evade
RA - Roll
ZA - Zap Magic (Left)
ZB - Zap Magic (Left)
ZC - Zap Magic (Right)
ZD - Zap Magic (Right)
WA - Sneak
WB - Walk
WC - Run
WD - Push
JA - Jump
JB - Falling (End of Jump) (Dropped Item left)
JC - Falling [Dropped item right]
HA - Hit
HB - Hit
HC - Hit
HD - Hit
KA - Killed
KB - Killed
KC - Killed
KD - Killed
MA - Misc (Drop Left Item)
MB - Misc (Drop Right Item)
MC - Misc (Cheer/Slam Left)

MD - Misc (Show Off/Slam Right/Rise from ground)
ME - Misc (Grab Item Left)
MF - Misc (Grab Item Right)
MG - Misc (Open Chest)
MH - Misc (Sit)
MI - Misc (Ride)
MJ - Misc (Object Activated)
MK - Misc (Snoozing)
ML - Misc (Unlock)
MM - Misc (Held Left)
MN - Misc (Held Right)

SPECIAL CODES

AL - Spawn an attack particle on the left weapon
DL - Drop the item in the left grip
GL - Grab an item with the left grip
CL - Grab a character with the left grip
AR - Spawn an attack particle on the right weapon
DR - Drop the item in the right grip
GR - Grab an item with the right grip
CR - Grab a character with the right grip
I - Make the character invincible
S - Stop the character from accelerating
F - Play a footfall sound
P - Poof the character

GRIPS

Grips are the last vertices placed in the model. They typically represent a character's (or creature's) left and right hand. Grips are also used for mounts, you put the grip where the character will ride... it can be thought of as the saddle for the mount. The scale, position and rotation of each set of grip vertices controls the scale, position and rotation of whatever other object the character is holding in that grip.

Grips have been notoriously difficult to work with. If the vertices are not in exactly the right order, the object you are holding appears stretched, squashed, distorted or worse.

You are allowed to use up to two grips per model. If you only need one, it will be considered the left grip in your data.txt file for the object.

The simplest way to add grips to your character is to cut and paste the grips from an existing model.

Make sure that you animate the grip vertices when you animate the rest of the model. You wouldn't want your character's hand to move, but whatever he's holding to remain still.

Here we have prepared two models. They are both included in the following archive:

- [grip.zip](#) (Requires internet connection to download)

grip.mdl is only one grip, for use with mounts and such. grips.mdl is a set of left and right grip vertices. You can extract the archive into your QME geometry folder, to easily add grips to your models. Or, you can just open the grip models in your favourite model editor, select the grip, copy it and paste it into your new model. Again, it's important that you add the grips last to your model, due to the nature of how Egoboo reads model data.

AI Scripting

EgoScript

EgoScript is a fairly simple scripting language that is very much like Assembly language programming. It has a very limited amount of variables that can be used, and reused, for calling functions or checking IF statements. Despite it's limitations, it's still possible to make some very creative behaviour for both objects and monsters. To learn more about EgoScript functions, check the Text directory that came with Egoboo. It contains several text files about the subject, including a full list of functions available.

The most important of those text files, as far as EgoScript is concerned, would be the AiDocs. These are included with the DEV package (Downloaded under Tools on <http://egoboo.sourceforge.net/>).

Escape Sequences

The MESSAGE.TXT files use cryptic little escape sequences to display certain types of information. Each sequence consists of a % followed by a letter or number. Here's a nice little list...

- %n - The character's name (or class if name is unknown)
- %t - The target's name (or class if name is unknown)
- %o - The owner's name (or class if name is unknown)
- %c - The character's class
- %s - The target's class
- %0 - The target's skin 0 name (some_Leather_Armor)
- %1 - The target's skin 1 name (some_Chainmail)
- %2 - The target's skin 2 name (a_Breastplate)
- %2 - The target's skin 3 name (a_Hero_Costume) (Most powerful level)
- %d - The value of tmpdistance
- %x - The value of tmpx
- %y - The value of tmpy
- %D - The value of tmpdistance (Use for stat display of pets)
- %X - The value of tmpx (Use for stat display of pets)
- %Y - The value of tmpy (Use for stat display of pets)
- %a - The character's ammo (or ? if unknown)
- %k - The character's kurse state (kursed or unkursed)
- %p - The character's possessive (his, her, or its)
- %g - The target's possessive (his, her, or its)
- %m - The character's gender (male_, female_, or _)

Expansions

The data files for Egoboo started out simple. Then they got complex, and I updated them. More complexity, and more updates, until I had so many files that updating them all individually took too long. That's why there are Expansions. Expansions are those cryptic

four letter IDSZ things at the bottom of certain data files. This document lists the different expansions and says a little bit about each one.

PARTICLE EXPANSIONS

Particle expansions go in PART?.TXT files, and are followed by a single number. Be sure to precede each with a colon, or it won't be read.

:[TURN] 0 // This isn't very useful... Don't turn with character
:[ARMO] 0 // Particle is armor piercing (Base defense of 0)
:[BLOC] 0 // Particle can't be blocked by a shield
:[ARRO] 0 // Particle only damages the character to whom it is attached
:[TIME] 0 // Don't set invincibility time on hit
:[PUSH] 0 // Don't push the enemy back on hit
:[ZSPD] 20 // 0 to 20 or so, Allows up/down aiming at targets
:[FSND] 2 // 0 to 15, Sound file to play when particle hits the floor
:[WSND] 4 // 0 to 15, Sound file to play when particle hits a wall
:[WEND] 1 // 0 or 1, Particle will end if it hits a wall
:[DLEV] -10 // -50 to 50 or so, Dynamic light level change, *1000 notation
:[DRAD] -10000 // -10000 to 10000 or so, Dynamic light radius change, *1000
:[IDAM] 1 // Add 25% of the owners intelligence as bonus damage
:[WDAM] 1 // Add 25% of the owners wisdom as bonus damage

CHARACTER EXPANSIONS

Character expansions go in DATA.TXT files, and are followed by a single number. Be sure to precede each with a colon, or it won't be read.

:[ICON] 1 // Force the icon to show
:[STUK] 0 // Don't allow particles to stick to character (arrows, etc.)
:[PACK] 0 // Don't let character be put in pack... For large items
:[VAMP] 1 // Character has no reflection
:[DRAW] 1 // Character is always drawn, even if far away from camera
:[RANG] 1 // Character is flagged as a ranged weapon
:[EQUI] 1 // Character is flagged as equipment, For worn items
:[SQUA] 1 // Character has a square base, Most are circular
:[SHAD] 1 // Draw the shadow, even if partially transparent
:[SKIN] 2 // 0 to 3, Override the skin given in SPAWN.TXT, For imports
:[DRES] 2 // 0 to 3, Flag a skin as "Dressy", May be used multiple times
:[CONT] 100 // 0 to 100 or so, Set the AI content to this
:[STAT] 50 // 0 to 100 or so, Set the AI state to this
:[HIDE] 3 // 0 to 100 or so, Don't draw when the AI state is this
:[GOLD] 200 // 0 to 9999, Set starting gold for the character
:[LEVL] 0 // Set the level to this +1, 0 is 1st level...
:[PLAT] 1 // 0 or 1, Character can use platforms?
:[RIPP] 0 // 0 or 1, Character makes ripples?

All the characters skills are also saved as expansions:

:[CKUR] 1 // Character can see kurses
:[POIS] 1 // Character can use poison without err
:[WMAG] 1 // Character can use Arcane magic
:[HMAG] 1 // Character can use divine magic
:[STAB] 1 // Character can backstab

```
:[READ] 1 // Character can read (Literate)
:[DISA] 1 // Character can find and disarm traps
:[AWEP] 1 // Character can use advanced weapons
:[TECH] 1 // Character can use technological items
:[JOUS] 1 // Character can joust with a lance
```

ENCHANT EXPANSIONS

Enchant expansions go in ENCHANT.TXT files, and are followed by a single number. Be sure to precede each with a colon, or it won't be read.

```
:[STAY] 1 // Stay around even after the owner has died
:[AMOU] 8 // 0 to 15, Amount to spawn each time
:[TIME] 25 // 1 to 100, Time until next spawn
:[TYPE] 0 // 0 to 7, Type of particles to spawn
:[FACE] 8192 // 0 to 65535, Facing add for each one...
:[SEND] 0 // 0 to 15, The end sound
:[OVER] 1 // 1 to 100, Create a child overlay object with this state
// The overlay follows the target around, and is killed when
// the enchantment ends...
:[CKUR] 1 // This allows the target to see kurses
```

MODULE EXPANSIONS

These go in the MENU.TXT files. These aren't entered by hand, rather a character in the module must use the AddIDSZ function to automatically append it to the file. Any given module may check another module to see if it has a given IDSZ, for hiding certain modules until a secret is found or the other module is beaten.

IDSZ

The IDSZ system is a way of describing objects using 4 letter words. For example, a crossbow has an IDSZ of [XBOW], and a sword has an IDSZ of [SWOR]. Why? It lets you add generic flags to the game, so other people can build on them. For example, I might want to make a sword that gets a bonus against Dragons. Since Dragons have a [DRAG] IDSZ, the sword's scripted AI can check if it hit a dragon, and do a little extra damage if it did. The nice part is that the weapon will also work against other [DRAG] creatures, like Dragonmen and Drag Queens, that I'm sure people will add in the future. The only way it will work though, is if everyone uses the same ID strings. So, before you make a [MINO] [TAUR], consult the lists located in IDSZ.txt (Located in the Egoboo Development package).

Making Modules

Common Problems

Egoboo Exits when attempting to load the module:

The first thing to check is the file Egoboo outputs. It creates a text file called "error.txt", which will contain the reason.

Slot Problems:

The most common cause for this error is a slot that is used twice. Look at Object Slots under Making Objects for more information if this is the problem.

Missing Start Point:

Another common cause is a missing start point. The start point must be added to either the spawn.txt file, or through EgoMap. In EgoMap, use the Objects mode, and pick a start point, and add it. For more information, see EgoMap's web page or ask in the Egoboo Forums.

MAKING PASSAGES

Passages are Egoboo's way of marking an area. The main uses for them are: Having a shop
Having doors that can open or close Detecting a character's presence in an area.

Passages are contained in the file passage.txt in a module's gamedat folder. It looks like this (this is from the adventurer starter's passage file).

```
//      TopleftXY BottomrightXY Open  ShootThrough SlippyClose
0 Deadend:  3 51  4 52    F   T      F
1 Deadend:  53 7   54 8    F   T      F
2 Door:     40 53  41 54    F   F      F
3 Armor:    48 27  49 28    F   F      F
4 Trog:     17 18  18 19    F   F      F
5 MamaLeft: 24 25  25 26    F   F      F
```

Here's what it all means:

The number at the left is the number of that passage. You'll need this number later for scripting. The name is just to help you remember which passage is which. Neither of these are read by Egoboo and are just there to help you out.

The TopleftXY and BottomrightXY are the boundaries of the passage. Unfortunately, as of right now you can't set the coordinates in EgoMap, so you'll have to do it manually. The easiest way is like this.

1. Open your module in Egoboo
2. Hold F5. This will display the coordinates of your character.
3. Go to the top left and bottom right corners of each passage you want and write down the coordinates.

Zefz Notes: Personally, I just use EgoMap to edit and add passages. Set Show Passages to True (Done in EgoMap) and modify passage.txt. Now reload the module and see how the passage changed.

Open is T or F. This is asking whether the passage is open or closed when the module begins. Set it to whichever is true. Open or closed refers to whether the tiles the passage is over are passable or impassable; set this by changing flags in Egomap.

Shoot Through refers to whether or not you can shoot through the passage. If set to T, projectiles will go through; if F, projectiles will be stopped when they hit the passage.

I've never used slippy closing, but I think what it does is set the tiles in the passage as slippy tiles instead of regular tiles. Try it and find out (or just leave it F and play it safe).

So, now you've got a file, `passage.txt`, which has the info for all the passages in your module. Now open up `spawn.txt`. You'll notice that one of the values that can be set for each object is the `Pas` value, which refers to passage. For each object that uses a passage, set that object's `Pas` value to the number of the passage that is relevant (you remember those numbers from before, right?). One object can interact with any number of passages; the `Pas` value is just an easy way of remembering which object goes with which passage, and the scripts for doors and buttons use it, so if you don't want to modify the scripts, set the value.

Now, on to the uses of passages: For doors, set the door to its associated passage. The standard ones are all scripted to use that, and will work without any further need for changes. All you have to do to get the door to open and close is call `OpenPassage` and `ClosePassage` (Egoscript commands) on the associated passage. Note that `OpenPassage` will only work if the passage is closed, and `ClosePassage` will only work if the passage is open. Buttons can do this automatically; for a standard button, just make sure that it's associated with the same passage as the door you want and it will open/close the door with no further need for changes (just make sure you have the right button; some require keys, some can close/open, and some can only either close or open). Any object can close and open doors/passages.

For shops. Please, don't script your own shop. Open the `shopkeep` object from Zippy City and base your shop on that. Basically, there is an Egoscript command, `AddShopPassage`, that turns a passage into a shop where you get paid for any item you drop and must pay for any item you pick up. The shop will function as long as the object that called it into existence is still alive.

Detecting character presence: The Egoscript function `SetTargetToWhoeverIsInPassage` does exactly what it sounds like it does. From that, you can test if the target is a player, is alive/dead, etc. for whatever you want.

Making your first passage will probably be annoying, but once you've made one it should be pretty intuitive.

11. OTHER

Here are some definitions of short-words and terms (Where * is a number or a string):

STR = The STR stat is the character's strength.

WIS = The WIS stat is the character's wisdom.

INT = The INT stat is the character's intelligence.

DEX = The DEX stat is the character's dexterity

DEF = The DEF stat is the character's defence.

EXP = The EXP stat is the character's experience.

Mana = Spellpoints or spiritual energy, needed for using spells.

Mana Return = Rate of mana regeneration.

Mana Flow = How much mana the character can channel at the time

Cursed item = A cursed item gives bad effects on a character, only a wizard spell can remove cursed items.

Magical item = Magical items gives good effects and benefits to you character.

Potion = A liquid that gives an effect on your character. Example: Refill health.

Health/Hitpoints = Also called HP. the HP of a character determinates how much hits a character can take before he dies.

Zorkmids = Money (\$), used to buy items in the sheep village.

*.OBJ = Items, characters and monsters are all named *.obj, which means object.

Example: Healer.Obj or Sword.Obj

data.txt = All objects have their own data.txt. In that text file you can edit every thing about them, such as health, exp and strength. Try experimenting with the text files, it is very easy editing them.

sound*.wav = Every sound a object makes is a wav. These wav files are played trough data.txt, enchant.txt or script.txt (The last one is the most common one).

part*.txt = These txt files describes how to draw different particles the object spawns. Fine examples are spell effects or blood (All weapons use particles to determine their damage). Example: part0.txt, part1.txt or part8.txt

naming.txt = This is the current name or the random name for a object.

message.txt = These are the different messages the object can show in the game.

tris*.bmp = The skin which is drawn upon the model of the object. Every object can have up up to four different skins (0, 1, 2 or 3). Example: tris0.bmp or tris3.bmp

Spell = A magical effect some characters can create trough the use of Mana

12. CREDITS

Here are the credits to those who have contributed something to the game (List may not be fully up to date and has no specific order):

ORIGINAL PROGRAMMERS

Aaron Bishop
Benjamin Bishop

MODULES

John Dick aka Booger
Johan Jansen aka Zefz
Arakon
Pteromys

CODING

Matty Noble aka Elmin
Arakon
Aleous
Jonathan Fischer
Ben Birdsey
Denis Jaimes
Johan Jansen aka Zefz
Gary Clark
Morgan
Ollipekka
Paco
Hans de Goede

SOUND AND MUSIC

Aleous
Klastek Timrak

OBJECTS

PurpleSquerkle
Johan Jansen aka Zefz
John Dick aka Booger
Hunna
Spyro
AiletheAlien
Pteromys
Ptapasu

ARTWORK

Hiroy
Chainsaw

ALSO WORTH MENTIONING

Arne Kristian Jansen
eatsonlyheads
Icezd
dolny
the happy pink elephant
Golem
Alazamir
Veiva
Clokinator aka Florian Natterer
Agent of Dread (Have a cookie!)
PurpleSquerkle
